

OMAN AND ITALY TWO MILLENNIA OF CROSS-CIVILISATIONAL DIALOGUE

*curated by H.E. Jamal al-Moosawi
Secretary General of the National Museum
of the Sultanate of Oman*

The cultural and civilisational ties between Oman and Italy are longstanding, and the two civilisations have enjoyed a lively exchange of goods, people and ideas for nearly two millennia. One of the noble purposes of this exhibition is the promotion of cross-cultural dialogue, which is all the more relevant in an age of geopolitical tensions, conflict, moral crises and social turmoil. We also pay homage to a number of notable Italian scholars who have left their mark on the unveiling of Oman's past, as well as to Omanis who have contributed to the introduction of Italian civilisation to Oman.

Throughout the past centuries, Italy has played a key role in revealing the foundational characteristics of Oman: its archaeology, its architectural heritage, its customs and traditions, its geography, its geology, its fauna and flora and its government. Some Italians have left their mark on our history, too.

This exhibition focuses on the archaeological legacy of these Italians, as well as on the publication of travelogue anthologies, accounts that give us an overview of documents, books, cartography and the arts. Likewise, common threads that attest to the bonds between our cultures are explored and highlighted, including the aflāj water management system, known in Sicily by the Arabic word qanat, and the ritualistic significance of al-lubān (frankincense) in the mosque and in church liturgy respectively, another point of contact between the imperial epochs of Oman and Italian-ruled Somalia.

SA'IDI DAGGER

1. Sa'idi-style dagger, belonging to Sultan Sayyid Humud bin Muhammad al-Busaidi Oman, late 19th century CE, horn, silver, steel, gold thread, leather, wood and fabric.
